

The Runic System

Mathletics meets Mr. Sasha's DND
Campaign

Twelve Runes Of Ran

TIR

ITH

NEF

TAL

ORT

THUL

SHAEI

IO

LUM

JAH

BER

ZOD

Individually, the runes
are beautiful and
meaningful.

But in combination,
they are **epic** &
magical!

By **combining runes** in certain items, you can enhance them magically.

These items will be usable in school D&D campaigns.

These are objects of power, heirlooms handed down from your ancestors to you for use in battle and adventure.

Example:

Enigma

BER+NEF+THUL+ORT in
chest armor.

ENIGMA

Chest armor
(Ber + Nef + Thul + Ort)

Once per long rest,
the possessor of
Enigma can cast
Teleport on
themselves.

““It's a riddle
wrapped in a
mystery inside an
enigma...”

How do you earn Runes?

At the end of a **side quest** or **main quest**, students are allowed to roll for a new rune.

The runes have **different probabilities** of showing up based on their rarity.

TIR 14%		ITH 14%	
NEF 12%		TAL 12%	
ORT 10%		THUL 10%	
SHAE 8%		IO 8%	
LUM 4%		JAH 4%	
BER 2%		ZOD 2%	

We'll keep track of your rolled
runes on a website hosted by
Mr. Sasha called RUNESWAP at
the url illswap.net/runes

Transforming Runes with Mr. Sasha

I get that students want to **trade in undesired runes** for ones they want.

To create a target rune, you must destroy a set of runes whose points are greater to the point value of the target rune.

<i>TIR</i> <i>2 points</i>		<i>ITH</i> <i>2 points</i>	
<i>NEF</i> <i>5 points</i>		<i>TAL</i> <i>5 points</i>	
<i>ORT</i> <i>9 points</i>		<i>THUL</i> <i>9 points</i>	
<i>SHAEL</i> <i>14 points</i>		<i>IO</i> <i>14 points</i>	
<i>LUM</i> <i>20 points</i>		<i>JAH</i> <i>20 points</i>	
<i>BER</i> <i>27 points</i>		<i>ZOD</i> <i>27 points</i>	

Example:

To make a **Ber rune** (27pts),

I could trade in:

Shael (14) + Ort (9) + Nef (5) = 28 pts 

***NOTE:** The Shael, Ort + Nef runes are destroyed in this transformation.*
